

SUGGESTION: MY GLOBE Journal

Use this as a journal background for your students as they collect data and make observations.

- 1) Cut this shape out of cardstock or cardboard for the base.
- 2) Copy student observation sheets for a unit or the whole year (If you copy full sheets @ ~ 85% reduction, they should fit on this shape - try it first to make sure.) Cutting away the excess margins will help the fit.
- 3) Place a second clipboard shape cut from cardstock on top as the cover.
- 4) Two staples at the top through all pages complete the journal.
- 5) Have students decorate and write their names on the cover.

Should you want to use a clipboard diecut, they may be purchased through AccuCut <http://www.accucut.com/> or Ellison <http://www.ellison.com/>

Here's a clipart version.
