GLOBE Malta and Latvia: Collaborating to Inspire Young Scientists in Primary-Grade GLOBE Classrooms
Students from Malta and Latvia just finished a year-long climate collaboration with a focus on cloud observations. The GLOBE teachers guided their students' study of cloud formations with a developmentally appropriate curriculum based on interdisciplinary learning—integrating science, arts, mathematics, cooking, and drama into their year-long study. >>

Win cool prizes!

- Post about your annual meeting experience on social media using **#GLOBEMeeting2024**
- Two raffle drawings: one for current followers and one for new followers!

Film Crews & Recorded Sessions

- Everyone signed a media release during registration.
- Key sessions are being recorded.
- Please be aware of cameras, mics, & other filming equipment.
- Please do not talk to the camera crew, they may be filming at that time.
- Questions? Ask GIO staff members.

Thank you! Enjoy the #GLOBEMeeting2024.

**We look forward to seeing your
photos and posts.**
