

Amplifying GLOBE's contribution: the story of GLOBE students

Dana Votapkova

GLOBE Europe and Eurasia
Region Coordination Office

Contamination of the stream Polička

- research project of students from village Bridlicna, Czech Republic
- determine how the water conductivity of the stream Polička change over time (2021 – 2023)
- identify possible sources of potential pollution
- create a map of sources polluting the stream Polička

Cooperation with scientists

- promotes the quality of students research
- local scientists – GLOBE scientific Board
- Doc. RNDr. Martin Rulík, Ph.D.
Department of Ecology and Environment,
Faculty of Science, University of Olomouc
- on-line / in-person meetings

Cooperation with the local community

- meeting with the mayor
- presenting results
- the municipality will use the project as one of the supporting arguments to justify the need to build wastewater treatment plant

Promotion of the project and its results

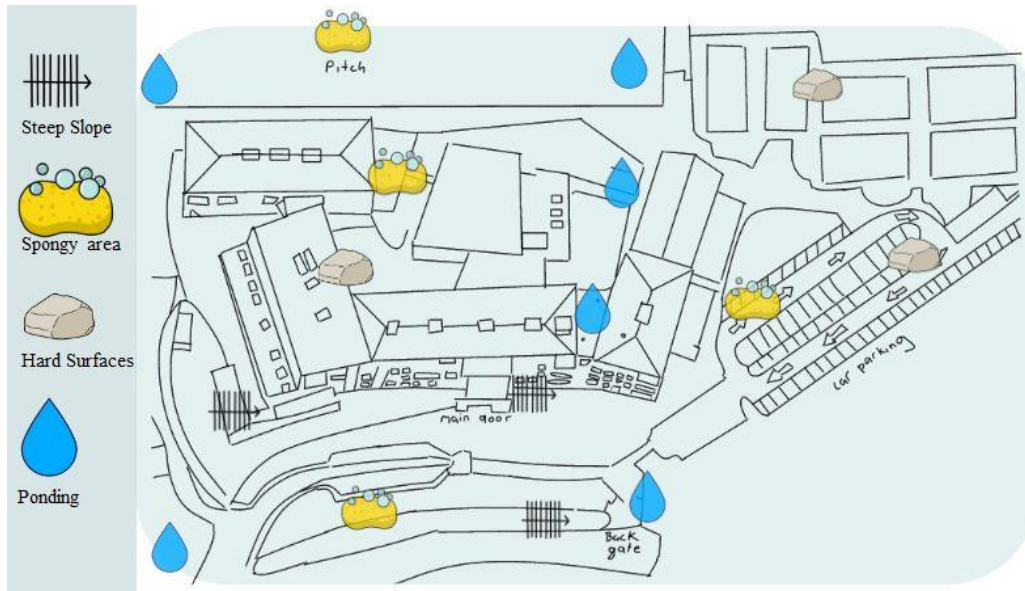

- Student conference in Melnik, Czech Republic
- [2024 GLOBE Virtual Student Conference of Europe and Eurasia](#)
- local [newspaper](#)
- local TV

Another examples of good practise

- [How spongy is your school? - Ireland](#)
- [How cool is your school? – Ireland, Malta](#)

LP = LOW POINT
 HP = HIGH POINT
 D = DRAIN + DOWN PIPE
 〰 = HEDGING
 III = STORM DRAIN
 S = SLOPE
 T = TREES
 P = PARKING
 ☀ = SUNNY
 ☁ = SHADY

Big things start from the little ones!

Thank you!
